

Rooftop Air Handler Dimensional Data

Group: **Applied Air**

Date: October 2007

Supercedes: 9035

Type RDS 708B, 800C & 802C
Type RAH 047C & 077C

Dimensional Data — RDS 708B

Section Options and Locations

Figures show section options, curb lengths, and relative positions. Curb lengths (in inches) are shown below each icon.

Figure 1: RDS 708B

Position A Outdoor Return Air	Position B Filter	Position C Heat/Cool	Position D Supply Air Fan	Position E Blank	Position F Final Filter*	Position G Discharge Plenum
Outdoor Air Hood  0"	Angular  33"	Drain Pan Only  48"	Front Discharge  33"	Blank Access  33"	Cartridge  33"	Discharge Plenum  33"
Return Plenum  33"	Cartridge  33"	Short Coil  48"	Down Discharge  33"		Blank Access  33"	
30% Outside Air  33"		Long Coil  48"				
Mixing Box  33"		Short Coil with Face & Bypass  48"				
Economizer  66"		Long Coil with Face & Bypass  48"				
Economizer with Return Air Fan  66"						

* When Final Filter section is provided, a Blank section (Position E) and a Discharge Plenum (Position G) are required.

Section Diagram — RDS 800C

Application Considerations — RDS 800C

Unit Coils

- 1 Unit cooling coils are available in either direct expansion or chilled water type and can be located in the Heat/Cool sections, position D and I, and in the Draw-through Cooling/Supply Air Fan section, position F.
- 1 Unit chilled water coils are available with or without a factory installed control valve when provided without a combination heating coil.
- 1 Unit heating coils are available in either steam or hot water type and can be located in the Heat/Cool sections, positions D and I, or the Heat sections, positions E and G.
- 1 Unit heating coils are available with or without a factory installed control valve in the Heat sections, positions E and G.

Contractor Coils

- 1 Contractor coils are available in direct expansion, chilled water, steam and hot water type and are located in the Heat/Cool sections, positions D and I.
- 1 Contractor coils are available with or without factory installed face and bypass dampers less actuator.

Electric Heat

- 1 Electric heating coils are located in the Blow-through Heat section, position G only.

Gas Heat

- 1 A gas heating furnace is located in the Blow-through Heat section, position G only.

Final Filters

- 1 Final filters are not available with a drain pan only or any option with a cooling coil located in the Blow-through Heat/Cool section, position 1.

Blank Access Compartment

- 1 The blank access compartment is available on units with a discharge plenum in position K with bottom or side discharge only.

General

- 1 When any section is located in position H (Blank Access section), I (Blow-through Heat/Cool section), or J (Final Filter section), a heating or blank section must be placed in position G to provide proper airflow diffusion for the sections that follow the supply air fan.

Position A - Outdoor/Return Air Section — RDS 800C

Figure 27: Outside Air Hood

Section Diagram — RDS 802C

Application Considerations — RDS 802C

Unit Coils

- 1 Unit cooling coils are available in either direct expansion or chilled water type and can be located in the Heat/Cool sections, position D and I.
- 1 Unit chilled water coils are available with or without a factory installed control valve when provided without a combination heating coil.
- 1 Unit heating coils are available in either steam or hot water type and can be located in the Heat/Cool sections, positions D and I, or the Heat sections, positions E and G.
- 1 Unit heating coils are available with or without a factory installed control valve in the Heat sections, positions E and G.

Contractor Coils

- 1 Contractor coils are available in direct expansion, chilled water, steam and hot water type and are located in the Heat/Cool sections, positions D and I.
- 1 Contractor coils are available with or without factory installed face and bypass dampers less actuator.

Electric Heat

- 1 Electric heating coils are located in the Blow-through Heat section, position G only.

Gas Heat

- 1 A gas heating furnace is located in the Blow-through Heat section, position G only.

Final Filters

- 1 Final filters are not available with a drain pan only or any option with a cooling coil located in the Blow-through Heat/Cool section, position I.

Blank Access Compartment

- 1 The blank access compartment is available on units with a discharge plenum in position K with bottom or side discharge only.

General

- 1 When any section is located in position H (Blank Access section), I (Blow-through Heat/Cool section), or J (Final Filter section), a heating or blank section must be placed in position G to provide proper airflow diffusion for the sections that follow the supply air fan.

Section Diagram — RAH047C

Unit Considerations — RAH047C

Splitting Units

- 1 All units with DWDI supply fans may be split at the Supply Air Fan section outlet.

Cooling Coils

- 1 Cooling Coils are available in either direct expansion or chilled water type and can be located in the Heat/Cool sections.
- 1 Chilled water cooling coils are available with or without factory installed three-way modulating control valve as well as face and bypass dampers and actuator.
- 1 Factory wired control of cooling coils is limited to one cooling coil section per unit.

Heating Media - Steam/Hot Water

- 1 Heating coils are available in either steam or hot water type and can be located in either the Heat/Cool sections or the Heat sections.
- 1 Heating coils are available with or without factory installed face and bypass dampers and actuator in the Heat/Cool sections. Factory installed control valves are not available on heating coils in the Heat/Cool sections.
- 1 Heating coils are available with or without a factory installed control valve in the Heat sections. Factory installed face and bypass dampers are not available on heating coils in the Heat sections.

Electric Heat

- 1 Electric heating coils can be located in the Blow-through Heat section, position G only on units with a DWDI supply fan

Gas Heat

- 1 A gas heating furnace can be located in the Blow-through Heat section, position G only on units with a DWDI supply fan. Factory wired control of cooling coils is limited to one heating section per unit.

Final Filters

- 1 If final filters are installed, a Discharge Plenum section is required in position K.
- 1 Final filters are not available on units with a SWSI supply fan.
- 1 Final filters are not available on units with a blow-through cooling coil in the Heat/Cool section, position I.

Blank access compartment

- 1 The blank access compartment is available on units with a discharge plenum in position K with bottom or side discharge only.
- 1 The blank access compartment is not available on units with a SWSI supply fan

General

- 1 When any selection is located in position H (Blank access section), I (Blow-through Heat/Cool Section), or J (Final Filter Section) a heating or blank section must be placed in position G to provide proper airflow diffusion for the sections that follow the supply fan

- (1) Blow-through sections not available on units with a SWSI supply fan.
(2) Burglar bars and isolation dampers not available when there are no sections between the supply fan and the discharge plenum for units with bottom discharge.

Unit Considerations — RAH077C

Splitting Units

- 1 All units with DWDI supply fans may be split at the Supply Air Fan section outlet.
- 1 Units exceeding 52 feet in length may need to be split at the Supply Air Fan section outlet for shipping purposes.

Cooling Coils

- 1 Cooling Coils are available in either direct expansion or chilled water type and can be located in the Heat/Cool sections.
- 1 Chilled water cooling coils are available with or without factory installed three-way modulating control valve as well as face and bypass dampers and actuator.
- 1 Factory wired control of cooling coils is limited to one cooling coil section per unit.

Heating Media - Steam/Hot Water

- 1 Heating coils are available in either steam or hot water type and can be located in either the Heat/Cool sections or the Heat sections.
- 1 Heating coils are available with or without factory installed face and bypass dampers and actuator in the Heat/Cool sections. Factory installed control valves are not available on heating coils in the Heat/Cool sections.
- 1 Heating coils are available with or without a factory installed control valve in the Heat sections. Factory installed face and bypass dampers are not available on heating coils in the Heat sections.

Electric Heat

- 1 Electric heating coils can be located in the Blow-through Heat section, position G only on units with a DWDI supply fan

Gas Heat

- 1 A gas heating furnace can be located in the Blow-through Heat section, position G only on units with a DWDI supply fan. Factory wired control of cooling coils is limited to one heating section per unit.

Final Filters

- 1 If final filters are installed, a Discharge Plenum section is required in position K.
- 1 Final filters are not available on units with a SWSI supply fan.
- 1 Final filters are not available on units with a blow-through cooling coil in the Heat/Cool section, position I.

Blank access compartment

- 1 The blank access compartment is available on units with a discharge plenum in position K with bottom or side discharge only.
- 1 The blank access compartment is not available on units with a SWSI supply fan

General

- 1 When any selection is located in position H (Blank access section), I (Blow-through Heat/Cool Section), or J (Final Filter Section) a heating or blank section must be placed in position G to provide proper airflow diffusion for the sections that follow the supply fan

 - 95% efficiency - staggered

Figure 133: Blank Section — 2' Section

Blank section - 2-foot section

Blank Access Sections — 4 Foot Section — Positions B, C, E G and H — RAH077C

Figure 134: Section Locations

Section locations

- ☐ Position B - draw-through filter section
- ☐ Position C - draw-through blank access section
- ☐ Position E - draw-through heat section
- ☐ Position G - draw-through heat section (includes diffuser)
- ☐ Position H - draw-through blank access section (3)

Notes:

- (1) This section may be located in one or more of the locations listed above.
- (2) Blank Access section in position G and H not available on units with a SWSI supply fan.
- (3) Blank Access section in position H requires a blank or heat section in position G.

Heat/Cool Section — Drain Pipe Only — Positions D or I

Figure 135: Section Location

Section locations

- ☐ Position D - draw-through
- ☐ Position I - blow-through (2)

Notes:

- (1) Blank Access section in position I not available on units with a SWSI supply fan.
- (2) Drain pan only section in position I requires a blank or heat section in position G.

Position D — Draw-Through Heat/Cool Section — Standard Face Area Coil — RAH077C

Figure 136: Cooling Unit Only

Cooling coil only

- ☐ Chilled water without valve and piping (51.9 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (51.9 sq. ft.)
- ☐ DX evaporator (54.7 sq. ft.)

Cooling Coil with Face & Bypass Damper

Cooling coil with face and bypass damper

- ☐ Chilled water without valve and piping (36.3 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (36.3 sq. ft.)

Damper Actuator

- ☐ With damper actuator
- ☐ Without damper actuator

Figure 137: Combination Heating & Cooling

Combination heating and cooling

Heating coil (42.2 sq.ft.)

- ☐ Steam coil without valve and piping
- ☐ Hot water coil without valve and piping

Cooling coil

- ☐ Chilled water without valve and piping (51.9 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (51.9 sq. ft.)
- ☐ DX evaporator (54.7 sq. ft.)

Figure 138: Heating Coil with Face and Bypass Damper (28.1 sq. ft.)

Heating coil with face and bypass damper (28.1 sq.ft.)

- ☐ Steam coil without valve and piping
- ☐ Hot water coil without valve and piping

Damper Actuator

- ☐ With damper actuator
- ☐ Without damper actuator

Position D — Draw-Through Heat/Cool Section — Large Face Area Coil — RAH077C

Figure 139: Cooling Unit Only

Cooling coil only - staggered

- ☐ Chilled water without valve and piping (72.6 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (72.6 sq. ft.)
- ☐ DX evaporator (76.6 sq. ft.)

Figure 140: Combination Heating & Cooling

Combination heating and cooling

Heating coil (42.2 sq.ft.)

- ☐ Steam coil without valve and piping
- ☐ Hot water coil without valve and piping

Cooling coil

- ☐ Chilled water without valve and piping (72.6 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (72.6 sq. ft.)
- ☐ DX evaporator (76.6 sq. ft.)

Door penetration vestibule required for heating coil connection. See Figure XXX for vestibule details

Cooling Coil with Face & Bypass Damper - Staggered

Cooling coil with face and bypass damper - staggered

- ☐ Chilled water without valve and piping (62.3 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (62.3 sq. ft.)

Damper Actuator

- ☐ With damper actuator
- ☐ Without damper actuator

Position E — Draw-Through Heat Only Section

Figure 141: Heat Only Section

Heating only section

- ☐ Hot water without valve and piping (42.2 sq. ft.)
- ☐ Hot water with 3-way modulating valve and piping (42.2 sq. ft.)
- ☐ Steam coil without valve and piping (42.2 sq. ft.)
- ☐ Steam coil with 3-way modulating valve and piping (42.2 sq. ft.)

Note: Typical hot water piping shown, see IM487 for typical steam piping.

Position F — Supply Air Fan Section — Mandatory Selection — RAH077C

Figure 142: Supply Air Fan — DWDI

- Supply air fan - DWDI
- ☐ 33"
- Fan type
- ☐ Forward curved
 - ☐ Airfoil
 - ☐ Airfoil with variable inlet vanes
- Options
- ☐ With belt guard
 - ☐ With light, receptacle and switch
 - ☐ With light, receptacle, switch and belt guard

- Supply air fan - DWDI
- ☐ 36"
 - ☐ 40"
- Fan type
- ☐ Forward curved
 - ☐ Airfoil
 - ☐ Airfoil with variable inlet vanes
- Options
- ☐ With belt guard
 - ☐ With light, receptacle and switch
 - ☐ With light, receptacle, switch and belt guard

Figure 143: Supply Air Fan — SWSI

- Supply air fan - SWSI
- ☐ 44"
- Fan type
- ☐ Airfoil without variable inlet vanes
 - ☐ Airfoil with variable inlet vanes
- Discharge opening
- ☐ Bottom discharge
 - ☐ Side discharge
- Options
- ☐ With belt guard
 - ☐ With light, receptacle and switch
 - ☐ With light, receptacle, switch and belt guard

- Supply air fan - SWSI
- ☐ 49"
- Fan type
- ☐ Airfoil without variable inlet vanes
 - ☐ Airfoil with variable inlet vanes
- Discharge opening
- ☐ Bottom discharge
 - ☐ Side discharge
- Options
- ☐ With belt guard
 - ☐ With light, receptacle and switch
 - ☐ With light, receptacle, switch and belt guard

Position G — Blow-Through Heat Only Section — RAH077C

Figure 144: Heat Only Section

Heating only section

- ☐ Hot water without valve and piping (42.2 sq. ft.)
 - ☐ Hot water with 3-way modulating valve and piping (42.2 sq. ft.)
 - ☐ Steam coil without valve and piping (42.2 sq. ft.)
 - ☐ Steam coil with 3-way modulating valve and piping (42.2 sq. ft.)
- See note below

Note: Typical hot water piping shown, see IM487 for typical steam piping.

Heating only section

- ☐ Electric heat

Note: Heat section in position G not available on units with a SWSI supply fan.

Figure 145: Heat Only Section

Heating only section

- ☐ Gas heat with controls (500-1400 MBh output)

Note: Heat section in position G not available on units with a SWSI supply fan.

Heating only section

- ☐ Electric heat

Note: Heat section in position G not available on units with a SWSI supply fan.

Position I — Blow-Through Heat/Cool Section — RAH077C — Standard Face Area Coils

Figure 146: Cooling Coil Only

Cooling coil only

- ☐ Chilled water without valve and piping (51.9 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (51.9 sq. ft.)
- ☐ DX evaporator (54.7 sq. ft.)

Note: Heat/Cool section in position I not available on units with a SWSI supply fan.
Heat/Cool section in position I requires a blank or heating section in position G.

Cooling Coil with Face & Bypass Damper

Cooling coil with face and bypass damper

- ☐ Chilled water without valve and piping (36.3 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (36.3 sq. ft.)

Damper Actuator

- ☐ With damper actuator
- ☐ Without damper actuator

Note: Heat/Cool section in position I not available on units with a SWSI supply fan.
Heat/Cool section in position I requires a blank or heating section in position G.

Figure 147: Combination Heating and Cooling

Heating coil (42.2 sq.ft.)

- ☐ Steam coil without valve and piping
- ☐ Hot water coil without valve and piping

Cooling coil

- ☐ Chilled water without valve and piping (51.9 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (51.9 sq. ft.)
- ☐ DX evaporator (54.7 sq. ft.)

See notes below

Note: Heat/Cool section in position I not available on units with a SWSI supply fan.
Heat/Cool section in position I requires a blank or heating section in position G.

Heating Coil with Face & Bypass Damper (28.1 sq. ft.)

Heating coil with face and bypass damper (28.1 sq.ft.)

- ☐ Steam coil without valve and piping
- ☐ Hot water coil without valve and piping

Damper Actuator

- ☐ With damper actuator
- ☐ Without damper actuator

See notes below

Note: Heat/Cool section in position I not available on units with a SWSI supply fan.
Heat/Cool section in position I requires a blank or heating section in position G.

Position I — Blow-Through Heat/Cool Section — RAH077C — Large Face Area Coils

Figure 148: Cooling Coil Only - Staggered

Cooling coil only - staggered

- ☐ Chilled water without valve and piping (72.6 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (72.6 sq. ft.)
- ☐ DX evaporator (76.6 sq. ft.)

Note: Heat/Cool section in position I not available on units with a SWSI supply fan.
Heat/Cool section in position I requires a blank or heating section in position G.

Cooling Coil with Face & Bypass Damper - Staggered

Cooling coil with face and bypass damper - staggered

- ☐ Chilled water without valve and piping (62.3 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (62.3 sq. ft.)

Damper Actuator

- ☐ With damper actuator
- ☐ Without damper actuator

Note: Heat/Cool section in position I not available on units with a SWSI supply fan.
Heat/Cool section in position I requires a blank or heating section in position G.

Figure 149: Combination Heating and Cooling

Heating coil (42.2 sq.ft.)

- ☐ Steam coil without valve and piping
- ☐ Hot water coil without valve and piping

Cooling coil

- ☐ Chilled water without valve and piping (72.6 sq. ft.)
- ☐ Chilled water with 3-way modulating valve and piping (72.6 sq. ft.)
- ☐ DX evaporator (76.6 sq. ft.)

Door penetration vestibule
required for heating coil
connection.
See Figure XXX for vestibule
details

Note: Heat/Cool section in position I not available on units with a SWSI supply fan.
Heat/Cool section in position I requires a blank or heating section in position G.

Position J — Final Filter Section — RAH077C

Figure 150: 56 sq. ft. Cartridge — 4 Foot Section

56 sq. ft. cartridge - 4 foot section
☐ 95% efficiency

See notes below

64 sq. ft. Cartridge — 6 Foot Section

64 sq. ft. cartridge - 6 foot section
☐ 95% efficiency - staggered

See notes below

Figure 151: 80 sq. ft. Cartridge — 8 Foot Section

80 sq. ft. cartridge - 8 foot section
☐ 95% efficiency - staggered

See notes below

Blank Access Section

Blank access section
☐ Blank - 4 foot section

See notes below

Figure 152: Blank Access Section

Blank access section
☐ Blank - 6-foot section

See notes below

Notes:

- (1) Final Filter section not available on units with a SWSI supply fan.
- (2) Final filters are not available on units with a blow-through cooling coil in the Heat/Cool section, position I.
- (3) Final filter option requires a discharge plenum in position K.
- (4) Final filter option requires a blank or heating section in position G.

Position K — Discharge Plenum — RAH077C

Figure 153: RAH077CS - 4 ft Standard Face Area Coil

- Discharge plenum (4-foot) for standard face area coil units
- ☐ Bottom discharge (see note)
 - ☐ Front discharge
 - ☐ Side discharge

Note: Discharge plenum not available on units with a SWSI supply fan.

Figure 154: RAH077CL and 077CY

- Discharge plenum (4-foot) for Blow-through units with large face area coils or without cooling coils in Heat/Cool section, Plenum I, and/or with Final Filter section, Position J.
- ☐ Bottom discharge
 - ☐ Front discharge
 - ☐ Side discharge

Figure 155: RAH077CL and 077CY Discharge Plenum 6 ft for Draw -Through

- Discharge plenum (6-foot) for Draw-through units with large face area coils or without cooling coils in Heat/Cool section, Plenum D, and without Final Filter section, Position J.
- ☐ Bottom discharge

Note: Burglar bars and isolation dampers not available when there are no sections between the supply fan and discharge plenum for units with bottom discharge.

Position L — Blank Compartment Section

Figure 156: Blank Compartment

- Blank compartment
- ☐ Out of airstream - 6-foot

Note: Blank Compartment section requires a discharge plenum with bottom or side discharge in position K.
